

1/1

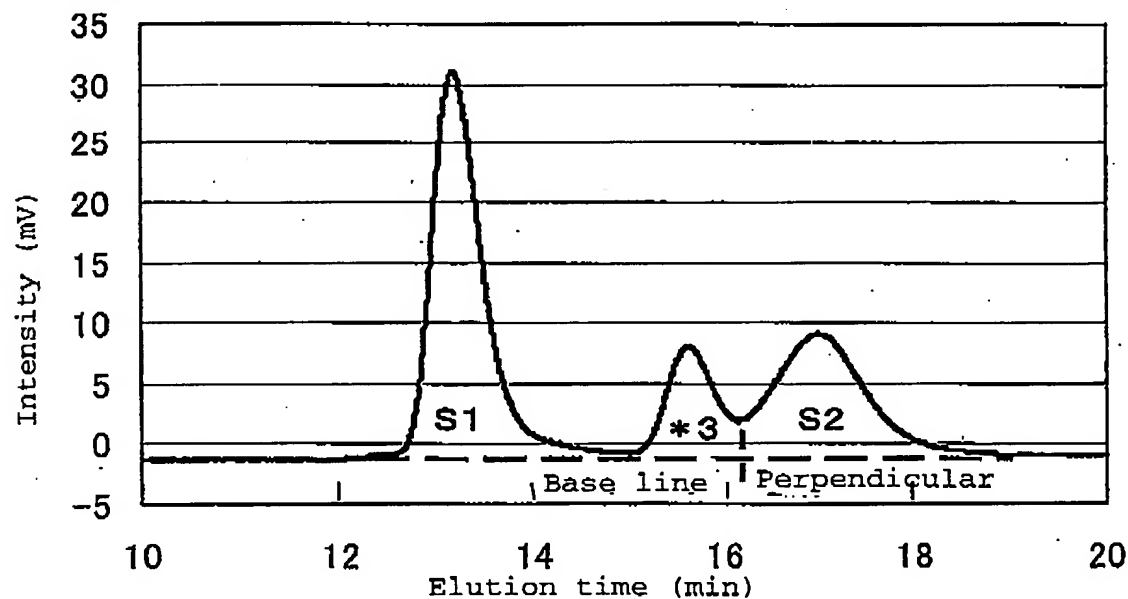

Fig. 1

*1: A peak at which the peak top molecular weight becomes maximum among peaks forming a proportion of the area of at least 30% to the whole peak area.

*2: A peak at which the peak top molecular weight becomes minimum among peaks forming a proportion of the area of at least 15% to the whole peak area.

Fig. 2

S1: A peak at which the peak top molecular weight becomes maximum among peaks forming a proportion of the area of at least 30% to the whole peak area.

S2: A peak at which the peak top molecular weight is at most 50,000 and which forms a proportion of the area of at least 20% to the whole peak area.

*3: A peak forming a proportion of the area of from 3 to 15% to the whole peak area among peaks at which the peak top molecular weight is from 13,000 to 50,000.
